-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: paragraph [0004], line 7, "unit" should be --units--; paragraph [0007], line 3, "sub-dick" should be --sub-deck--; and paragraph [0026], line 6, "processed" should be --processes--.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 1, line 9, "during loading of the sub-deck" and claim 5, line 2, "when the sub-deck is loaded" are inaccurate since the "sub-deck" is not "loaded", rather it moves when a cassette is loaded. Therefore this should be changed to --during loading movement of the sub-deck— and --when the sub-deck is moved in a loading direction-- to render these claims clear. Further, in line 10 of claim 1, "the sliding member" is without antecedent basis.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3654

5. Claims 1-3, 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Konishi et al. The device of Konishi et al includes a pivoting lever 53 having a pinch roller 55 rotatably supported thereon that is adapted to be brought into engagement with the capstan 50 during loading movement of sub-deck 3, a torsion spring 57 coaxially connected with the pivoting lever 53 and functioning in a manner as claimed, and wherein the sub-deck 3 (which is also the "sliding member" as claimed) pushes against a protrusion 59 on the lever 53 during loading movement of the sub-deck 3, as recited in claim 5.

Allowable Subject Matter

6. Claim 4 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Osanai, You, Ohkubo et al and Tanaka et al are cited to show other torsion spring operated pinch roller devices.
